

Help

1. Using the Make A Sale window

1. Enter the product name
2. Enter the product code .(Only numbers between 0 – 9)
3. Enter the unit price of the product.(Only numbers between 0 – 9 and if it is a float, format allowed is ###.##)
4. Enter the quantity.(Only numbers between 0 – 9)
5. Enter the discount.(Only numbers between 0 – 9)
6. Adds the product to the second table if all the fields mentioned above are filled and clears all the previous entries so that a new product can be added again.
7. Finishes the sale and show you the bill for the recently made sale.
8. Remove all the data from the second table if there are any mistakes.
9. Exit the window.
10. Displays the total amount of the sale ongoing.
